Find Out What Your Current Financial Planner Isn't Telling You

Most financial planners specialize in the accumulation of assets which puts your money at risk. As you enter your retirement years, it's important to work with a preservation and distribution specialist so that assets are preserved and then passed to the next generation with minimal tax liability.

Did you know that you don't *have* to lose money in the market when everyone else does?

Did you know that you don't *have* to settle for a fraction of a percent ROI -- like what you get from banks on your CD's or what may seem more like "Certificates of Disappointment"?

Did you know that there are proven, *safe* money strategies, which *provide income for life* and that *come with guarantees*? These financial vehicles actually allow you to protect and preserve your assets.

You haven't heard of them before because **most financial planners have a fiduciary responsibility to the companies they represent – not to you, their client!** If their companies don't offer these private pensions, you will never hear that they are out there – even if that's what would serve you best.

There is a Better Way

What if...in spite of the stock market; good, bad, or ugly, your assets are protected and shielded? **If the market goes up, you make money. If the market stagnates, you still make money**, (albeit, not as much). **If the market goes down, you don't lose a cent!** (When things are really bad, it's not just about return on your principle, but return of your principle, isn't it?)

What You Don't Know Can Hurt You!

Simply put, your retirement is at risk.

It's *imperative* that you learn what your options are to protect and shield your assets while creating guaranteed income for life by coming to one of **our Eye of the Storm seminars**, or by meeting with **Greg Palka** for a **complimentary 60-90 minute consultation**.

Our seminars and consultations are designed to *help people*, especially retirees like you, to learn strategies to *win* in spite of the economic storms and challenges you're caught in, to *get your questions answered*, and to *have fun* in a relaxed environment. The information provided will help you assess where you are now and what steps need to be taken to **secure your future**.
